May 2020 Release Notes

ANYTIME pediatrics

Release Notes
5/1/2020

What's New

Web

- **3rd Party invitation** –We are very excited about this new feature! You can now bring another parent, family member, or caregiver into the pediatric visit with the click of a button.
  This feature is enabled under permissions
- **Video refresh button** - Every once in a while users may experience less than stellar video quality in a visit. We wanted to give users the ability to resolve the issue. Simply click the new refresh button and re-establish the connection. Hopefully this makes everything better.
  This feature will be enabled for everyone by default
- **Text in SMS notifications update to distinguish between 'on demand' and 'appointment'**
  This feature will be enabled for everyone by default
- **Current Temperature added to Visit request details**
  This feature will be enabled for everyone by default

Mobile (iOS and Android) version 2.2.5

- **Current Temperature added to Visit request details**
  This feature will be enabled for everyone by default

What's Fixed

- We are always working on performance improvements behind the scenes. Hopefully, you have noticed. We will notify you when there are specific bug fixes that will improve overall user experience.
