Clinician Waiting Room Messenger

- All Clinicians have a messaging feature that allows them to communicate with their patients in the waiting room who are currently waiting for the Clinician to begin their telemedicine visit. This feature is called the Clinician waiting room messenger.
- The Clinician can message patients in the waiting room by clicking on “waiting room” that is located on their telemedicine visit screen.

- The patient from the waiting room will not be able to chat back and forth with the Clinician, but the Clinician will be able to send them messages.
- Once the Clinician selects the waiting room, the Clinician will be able to see the patients that are currently in the waiting room, along with the time that shows how long the patient has been waiting.
- The Clinician will need to select the patient they would like to speak with from the waiting room.

Once the patient has been selected, the Clinician will have the option to send an automatic message or write their own message to the patient.

The screenshot shows a patient selection interface. At the top, there is a header for a patient named "Eileen Test" with a DOB of "9/19/10". Below this are sections for "Allergies:" and "Other:". A "Visit Info" section is also present. Below that are sections for "Symptoms:" and "Current Medications:". A navigation bar contains tabs for "Chat", "Images", "Clinical Notes", "Admin Notes", "Parent", and "Waiting room". The "Waiting room" tab is active, displaying a list of patients. The first patient is "STEVIE FOLEY" with account "Eileen F" and ID "1231231231", with a "2 mins" status. Below the list is a dropdown menu labeled "Select Message" with a blue highlight on the first option. The dropdown menu contains three options: "Select Message", "Hello, I am finishing with a previous patient and I will be with you soon.", and "Sorry the clinician is running behind, they will be with you soon." Below the dropdown is a "Submit" button.

- The waiting room messenger will only appear if you have a patient in your waiting room. If the waiting room is empty, the waiting room messenger will not appear during the telemedicine visit.

The screenshot shows a patient selection interface. At the top, there is a header for a patient named "Eileen Test" with a DOB of "9/19/10". Below this are sections for "Allergies:" and "Other:". A "Visit Info" section is also present. Below that are sections for "Symptoms:" and "Current Medications:". A navigation bar contains tabs for "Chat", "Images", "Clinical Notes", "Admin Notes", and "Parent". The "Chat" tab is active, displaying a message: "Someone will be with you shortly." Below the message is a timestamp: "System - 5:07:10". Below the timestamp is another message: "Hello, someone will be with you shortly."
