

# Notification Settings

Last Modified on 01/18/2021 2:29 pm EST

## How to enable or disable your notification settings

Follow the instructions below to learn the multiple ways how a user can easily adjust their notification settings.

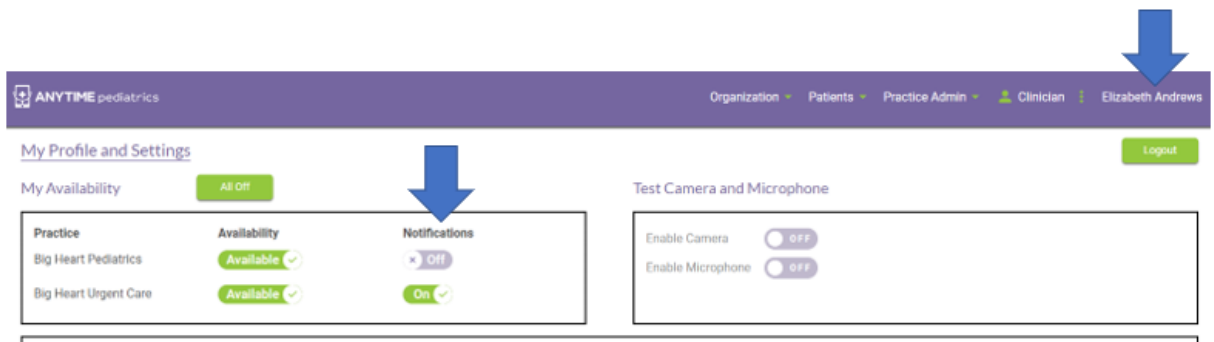

### Availability Popup

- When a user signs into the Anytime Pediatrics platform they will receive a popup that provides easy access to adjust their notification settings.

A screenshot of a web application popup titled "My Availability". The popup has a white background with a grey border. At the top left, it says "My Availability" in bold. To its right is a green button labeled "All Off". Further right is a blue downward-pointing arrow. Below these are three columns: "Practice", "Availability", and "Notifications". The "Practice" column lists "Big Heart Pediatrics" and "Big Heart Urgent Care". The "Availability" column shows "Available" with a green checkmark for both. The "Notifications" column shows "Off" with a grey 'x' icon and "On" with a green checkmark icon. Below the table is a section titled "Permissions to Camera and Microphone" with two toggle switches, both set to "OFF". To the right of these is a green button that says "See all your Settings and Test Your Camera and Microphone". At the bottom center is a button labeled "Close window".

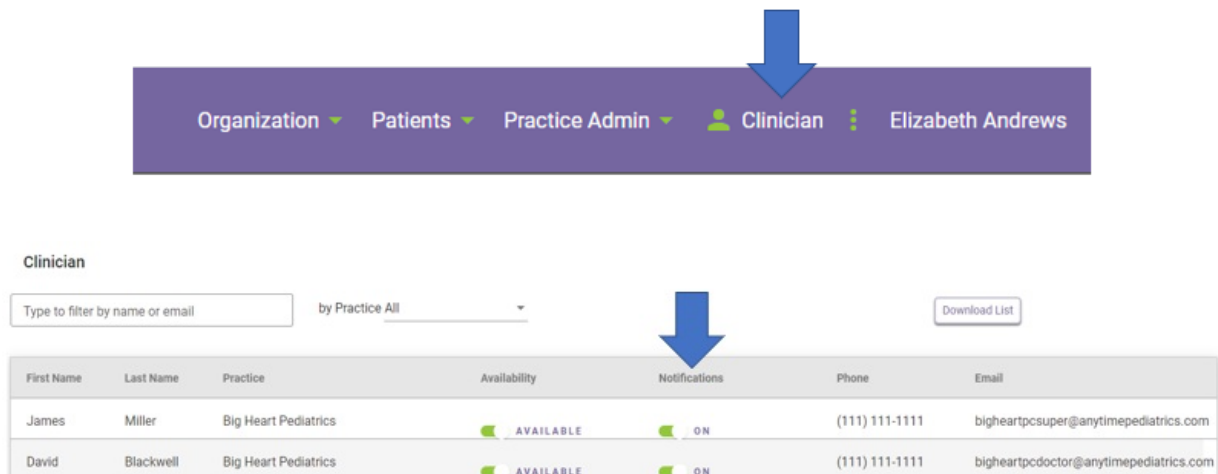

### Login Page

- A user can click on their name in the top right-hand corner to easily enable or disable their notification settings from their login page.

## Clinician Tab

- A user can also click on the clinician tab at the top of the screen to disable their notification settings or the notification settings for a specific user from your practice.

- Permanently disable a user's notification settings by clicking on the user's name and enabling or disabling the notification options at the bottom of the popup screen.
