

# How to make a phone call on the Anytime Clinician App

Last Modified on 09/25/2024 3:38 pm EDT

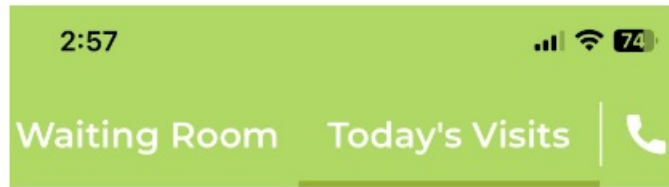

Follow the steps below to learn how to make an outbound phone call on the Anytime Clinician App

- Download the Anytime Clinician App from the Apple Store or the Google Play Store
- Log in using your current credentials
  - If you are unsure what your credentials are, reach out to our [customer service department](#) to verify if your account has been established.
- Once you are logged in, click on the waiting room icon in the bottom left corner of your screen

- Select the Phone Icon in the top right corner

- Search for the patient that you would like to call

A search form titled 'Search Parent' with a close button (X) in the top right. It contains three input fields: 'Parent First Name' with the value 'Eileen', 'Parent Last Name' with the placeholder 'Enter Parent Last Name', and 'Parent Email Address' with the placeholder 'Enter Parent Email Address'. Below the fields is a green button labeled 'Search For Parent' with a yellow arrow pointing to it from the right.

- Once you have selected the correct patient, click on the green phone icon to make an outbound phone call to that phone number.

The same search form as above, but with a list of search results below the 'Search For Parent' button. The list is titled 'Parent Name, Phone, Email' and contains four entries, each with a radio button. The first entry is selected. Below the list are three icons: a yellow arrow pointing right, a green phone icon, and a green dial pad icon.

If you can not locate the correct patient, select the dial pad icon to enter a phone number manually to make an outbound call.
